TECHNICAL SKILLS

Languages

JavaScript, Java,
Python, C, SQL

Frontend

React.js, HTML5, CSS3,
Responsive Design

Backend

Node.js, Express.js,
RESTful APIs, JWT Auth

Databases

MongoDB, MySQL,
Supabase

Cloud & Tools

Render, Vercel, Netlify,
MongoDB Atlas, Git,
GitHub, Postman

Practices

Agile/Scrum, CI/CD,
SaaS Deployment,
Version Control

EDUCATION

B.Tech – AI & Data Science

SRGEC, Gudlavalleru
2023–2027 | CGPA: 8.39
NATS Eligible

Intermediate (MPC)

VIBM Junior College
2021–2023 | 95%

SSC

Apex High School
2020–2021 | 98%

ACHIEVEMENTS

- 2nd – AgriTech Hackathon 2025
- 3rd – AI Maze Hackathon
- 3rd – Project Expo, SRGEC

CERTIFICATIONS

- Stanford CS101 (edX)
- MySQL – Scaler
- Frontend React.js – Udemy
- Full Stack MERN – NPTEL

PROFESSIONAL SUMMARY

B.Tech (AI & Data Science) student with proven experience building and deploying production-grade MERN stack applications. Skilled in RESTful API design, JWT authentication, Agile SDLC, and cloud-based SaaS deployment (Render, Vercel, MongoDB Atlas). Passionate about AI-enabled engineering and collaborative software delivery — aligned with Cisco's Software Engineer Trainee apprenticeship.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern

WebStack Academy | Sep 2025 – Nov 2025

- Built HomelyHub, a full-stack rental platform with JWT auth, role-based access, Razorpay, ImageKit, Redux Toolkit; deployed using Agile SDLC on Netlify + Render + MongoDB Atlas.
- Simulated real-world SaaS delivery pipeline with automated email (Mailtrap), media CDN integration, and full version control via Git/GitHub.

Full Stack Developer Intern

SmartBridge Educational Services | May 2025 – Jun 2025

- Architected DocSpot, a MERN doctor appointment platform with role-based dashboards for 3 user types and 10+ RESTful APIs with JWT-based secure authentication.
- Delivered responsive React.js UI ensuring cross-device compatibility and optimized rendering across all screen sizes.

PROJECTS

ShopX – Full Stack E-Commerce Platform

React.js, Node.js, Express.js, MongoDB, JWT | [shopx-1-xg8a.onrender.com](#)

- Full MERN e-commerce app — 12+ RESTful APIs, JWT auth, Razorpay payments, role-based access, cart & order management; deployed on Render + Vercel.
- AuthContext + CartContext for global state; scalable MongoDB schemas for users, products, and orders.

Civic Issue Reporting System

HTML5, CSS3, JavaScript, Supabase, REST API

- Full-stack complaint platform with Supabase RESTful APIs, real-time tracking for 100+ users; fully responsive cross-device design.

Crop Sink – Smart IoT Irrigation System

Python, IoT, GSM, Soil Sensors, Embedded Systems

- IoT irrigation system with soil sensors, GSM, Auto/Manual/Timer modes; ~30% water waste reduction. Presented to IT Minister of AP — 2nd Prize, National AgriTech Hackathon 2025.
